Tips on counting your garden birds

- Each week, take note of the highest number of birds of each species that you see in your garden. For example, if five is the highest number of Blue Tits you see, enter '5' on the form overleaf. If you don't see any that week, leave the space blank.
- If you see some birds almost every day, remember that we only want your highest count for a species in a given week.
- Count as accurately as possible. Please do not use plus signs as we do not know whether that means at least one or as many as 500!
- Birds of prey seen hunting in or over your garden should be counted (for example, a hovering Kestrel).
- Feral pigeons and racing pigeons should be counted.
- If you see a bird that is not on the list overleaf, please add it to the end of the form.
- Count birds that come into your garden even if they do not feed on the food you put out for them.
- Please don't count birds that you see outside the garden, such as flocks of swans on nearby fields, or birds flying overhead.
- If you can, hang your feeders on or near a tree or bush so birds can approach safely and retreat quickly into cover.
- Make sure the birds have a regular supply of food. Keep the feeders topped up and also provide water.
